The screenshot displays the DBeaver SQL editor interface. The top pane shows the SQL query: `SELECT first_name, last_name,birth_date FROM employees ORDER BY birth_date >1960-01-01;`. The bottom pane shows the results of the query, which are 15 rows of employee data. The results are displayed in a table with columns: first_name, last_name, and birth_date. The data is sorted by birth_date in ascending order. The 12th row, corresponding to Patricia Bridgland, is highlighted. The status bar at the bottom indicates that 89 rows were retrieved.
